

## WDC REPORT 2018-2019

The concept of WDC has been envisaged to appreciate the role of women in the society and challenges faced by her. To justify this vision we try to organize various activities under its forum in the college. In the past few years we have invited eminent lawyers, self defence experts, environmentalists and medical experts etc. to empower and enlighten women.

Change in the lifestyle is a malady of modern time which has impacted almost all dimensions of women's health. Great challenges ,therefore , await the gynaecologists in the times to come. Hence an expert gynaecologist was invited as the guest of honour for the event organized under the aegis of WDC this year. Professor Sudha Prasad ,MD, Director, Coordinator IVF Programme at IVF and Reproductive Biology Centre, Department of Obstetrics and Gynaecology , Maulana Azad Medical College was the speaker who delivered a talk on "Today's Lifestyle and Gynaecological Disorders."
